

Windows 10

Change the default Photo viewer or Music/Video player app

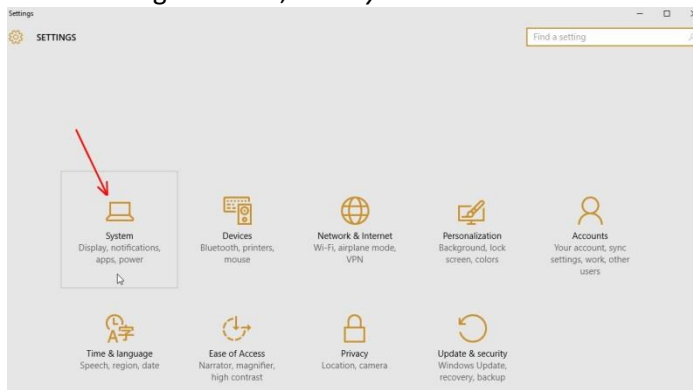

Windows 10 comes built in Photo, Music and Video apps. Try these out and see if you like them. You may prefer to use a different Photo viewer, Music or Video player, such as the Windows 7 style photo viewer, Picasa, or your camera software. If you used one of these apps in Windows 7 or 8 and you upgraded to 10 then the app will still be there but you may have to make it the default. For a new Windows 10 computer you need to download and install it, then make it the default.

To make your new Photo app the Windows default (follow similar instructions for Music or Video):

Click on Start > Settings

In the Settings window, click *System*

Click *Default Apps*, look for *Photos* and click on the app underneath that (eg *Photos*) and choose your preferred viewer (eg Windows [7] Photo Viewer) which should appear in the drop-down box.
