

# Windows 10

## Choose a different default web browser

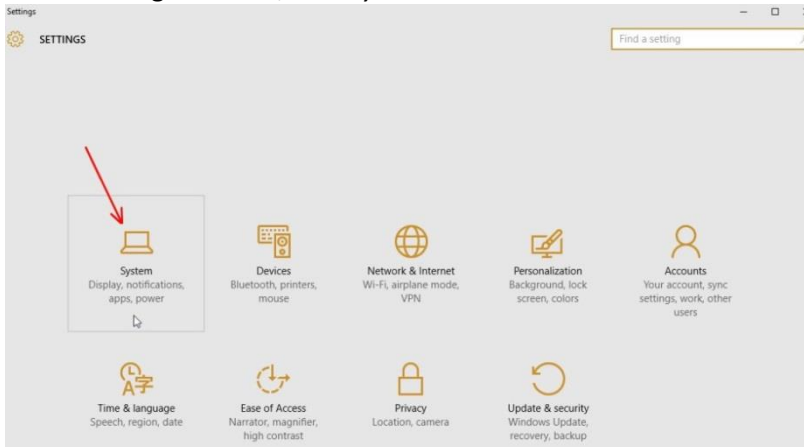

If you choose not to use the new Microsoft Edge web browser, and you prefer *Internet Explorer*, *Firefox* or *Chrome* browsers to open web page links that you click on (such as a link in an email in an email), you need to make your preferred browser the default.

If you used Firefox or Chrome in Windows 7 or 8 and you upgraded to 10 then the app will be there but you may need to make it the default. For a new Windows 10 computer you need to download and install it, then make it the default.

Click on Start > Settings

In the Settings window, click *System*

Click *Default Apps*, look for *Web browser* and click on the app underneath that (eg *Microsoft Edge*) and choose *Internet Explorer* in the drop down box. (Or you could set Firefox or Chrome to be the default (you would need to download them and install them first though.)
